- **19/12/16**: ISIS claims responsibility for an attack involving a truck jumping the sidewalk and crashing into a Christmas market in Berlin, Germany on Dec. 19, 2016. The truck plows into the pedestrians, killing 12 and injuring dozens more.
- **19/12/16**: On Dec. 19, 2016, the head of the International Monetary Fund (IMF), Christine Lagarde, is found guilty by a special court in France
- **25/12/16**: On Dec. 25, 2016, British singer George Michael, who rocketed to stardom with WHAM! and went on to enjoy a long and celebrated solo career punctuated with controversies, dies at 53.
- **1/1/17**: A New Year's day attack in Istanbul, Turkey, with at least 39 dead and dozens wounded.

- **22/3/17:** On 22 March 2017 a terrorist attack took place in the vicinity of the Palace of Westminster in London, seat of the British Parliament.
- **22/02/17:** Discovery of 7 Earth-sized planets orbiting star Trappist-1 announced in Journal "Nature" - raises possibility of alien life
- **26/02/17:** 89th Academy Awards: Best Picture "Moonlight" (after mix-up), Best Director Damien Chazelle, Best Actor Casey Affleck, Best Actress Emma Stone
- **3/02/17:** Mass grave of 800 children and infants confirmed at a former Catholic care home in Tuam, Ireland.
- **8/03/17:** Barcelona in a great comeback become 1st team to overturn 4-0 deficit beating St-Germain 6-5 in return game to reach Champions League quarter finals
- **29/3/17:** UK Prime Minister Theresa May signs article, sends to the EU, formally triggering Brexit
- **3/4/17:** Bomb at St Petersburg metro kills 11, 2nd bomb defused
- **8/4/17:** Another terrorist attack in the heart of the Swedish capital Stockholm, when a truck drove into pedestrians killing at least 4 people and injuring another 11.
- **9/4/17:** Two terrorist attacks occurred in churches in Egypt with many victims and several injured.

by Dinopoulos George, Maragos John and Pettas Theodoros

EUROPEAN MOBILITY WEEK

The European Mobility Week campaign is an opportunity to present mobility alternatives to citizens, to explain the challenges that cities and towns are facing in order to cause behavioural change and make progress towards creating a better transport strategy for Europe. Since 2002, European Mobility Week has tried to affect mobility and urban transport issues, as well as improve the

health and quality of life of citizens. The campaign also gives citizens the chance to explore what the role of city streets really is, and to explore solutions to face urban challenges, such as air pollution.

Our school, having understood how important the goal of European Mobility Week is, decided to take part. The events that our town organized lasted two whole days. On the first day, a group of third grade students, accompanied by Mr. Sioutas, went to the hill of Prophet Elias. There were other students from other schools there as well. They were all given t-shirts from the Mobility Week organization to wear. The experts talked to the students. They explained how to orientate in a forest and in a

town only with just a piece of wood, and compass or how to observe the sun. The students took part in activities, were given instructions in archery by members of "Trekking Hellas" organization, and given a chance to improve their archery skills.

All the students were given the chance to compete in an archery tournament. Eugene Koutsagias, a student of our school was the winner of tournament. He was announced as the best archer of all. A great moment for our school. After that, all students were given the chance to experience the magic FLYING-FOX offers. This was the most exciting part for the majority of students.

The following day, students were given questionnaires and other tasks to complete. The questionnaire involved questions about people's daily use of their bike and the problems they face.

The results were really encouraging, as almost 95% of them prefer biking to using cars or other means of transport. Grippled to pleasure, students biked right up to the Town Hall. There they were given special Mobility Week t-shirts and whistles. They biked through every corner of the town, handing out leaflets to illegally parked cars, informing drivers of the new bike line that is going to operate soon. After this two-day event, a draw was held and Andreas Karaiskos, a third year student, won a bike.

SCHOOL THEATRE FESTIVAL

The school theatre festival of Trikala, Karditsa and Larisa 'MONOLOGUES FROM THE AEGEAN' was carried out with great success. It took place on the 18th March 2017 at the cultural centre of Trikala. The 1st

Gymnasium of Trikala was represented by 14 students and Mrs Stella Siomou, our humanity teacher.

This action is part of a programme called '**What if it was you?**'. It is an awareness programme concerning human rights, breaking stereotypes and prejudices, setting a positive attitude to diversity and the integration of migrants.

The means used were experiential activities, theatre techniques and educational drama. The programme is implemented by the Pan-Hellenic network for theatre education with the cooperation of the United Nations High Commission for the migrants. Our school would like to thank Mrs Antonella Chira, actress and theatre educator from the Panhellenic network for theatre in Education, for her great assistance in our effort.

By Vasia Tsirona and Elena Barouta

SCHOOL CHOIR FESTIVAL

Our school choir took place in the 9th school choir meeting in Mouzaki, a town of Karditsa , on the 17th of March. It is considered to be part of an international choral festival with a history which goes back 35 years. The students of our school did their very best representing both our school and our town. Our choir won the credit from the art director Mr. Nikos Efthimiadis and the presenter of the event Mr. Alexis Kostalas. Schools from many parts of Greece and other countries, such as Serbia, Albania, Bulgaria and Italy participated in this magnificent event, with a total of about 5000 students being involved. Our choir was accompanied by the school musicians , the pianist, Eva Triantafillou, Efthimios Giotis , the electric guitarist, and Pavlos Galanis , our drummer. Mrs Kolova, our music teacher was responsible for the training of the chorus.

By Vasia Tsirona .

BRIEFING FOR SAFE ACCESS TO THE INTERNET.

On the 16th of March, a group of 24 students took part in a meeting concerning " Safe Navigation on the Net", which was organized by the local administration of the International Police Union, in cooperation with the town council of Trikala and the support of National Secondary Education office . The students were accompanied by the teachers:

Mrs Zafiri, Mrs Megarhioti and Mrs Phillipou.

Suggestions were made by the officers of Electronic Crime Prosecution and the students were informed about cyberbullying, which means bullying through electronic appliances. It includes the repeated sending of threatening messages with racist or sexist content, false information profile

creation, false news, personal information, photos, , videos and also the incitement of a person to join in , in order to cause violence.

by John Gallos

The 6th of March is the International day against bullying, so our school decided to dedicate a little time to an activity which included a short-lasting film referring to bullying and its effects. So what does "bullying" exactly mean, which are its types and characteristics and what does it cause to its victims?

STOP BULLYING

STAND UP. SPEAK OUT.

EMOTIONAL

What is bullying? Bullying is when someone is being hurt either by words or actions, feels awful about it and can't do something about it. **Bullying** can be

PHYSICAL

Taking and breaking other person's things.

Pushing and tripping
Hitting

Calling him names.
Making fun of someone.
Laughing at someone
Telling lies about someone.
Sending awful messages on the internet or on his mobile phone.
Making someone feel bad of who they are

WHERE CAN BULLYING HAPPEN?

It can happen anywhere!!!!!! !

- In the neighbourhood
 - At school
 - On line
- * Going and coming from school

CYBERBULLYING

What you should do if you are bullied!!!!!!

- If you are sent bad messages, look at the kid bullying you and tell him to stop in a calm, clear way.
- If you are posted pictures that are not yours, you could also make it look like a joke and laugh with his remark.
- If somebody makes negative comments about you, walk away and stay away !!! Don't fight back!!
- If someone threatens you online, talk to an adult you trust. Don't keep your feelings inside.
- Stay near your friends, avoid being alone.
- Always think of what you post on the internet. Do not share information that could hurt or embarrass someone.

WHEN YOU SEE BULLYING, WHAT SHOULD YOU DO?

- Talk to a parent, teacher, anyone you trust!!
- Be kind to the person being bullied.

- Stand up for the person being bullied, don't become part of the problem. Unfortunately, you can't control what others say, but you can control how you react.

Spread the word that

bullying has to stop!

By Eftihia Adamou & Evangelia Manthopoulou

Mobile phones

Nowadays in our modern society, a common phenomenon are the advantages and disadvantages of the use of mobile phones. There appear to be controversial opinions on this issue. But the question is: Is this really true? Let's find out!!

First of all, there are numerous advantages of mobile phones. One benefit is that we have access to information and we keep up to date. Furthermore, it is not time-consuming and it is portable, easy to carry anywhere, anytime. Moreover, we can communicate with people from all over the world. What is more, young people may be given assignments requiring the use of a mobile phone. Finally, a lot of people believe that "if you are not mobile phone literate, you are a handicap". What is your opinion?

On the other hand, there are a lot of disadvantages of mobile phones. One drawback is that teenagers become addicted to them. In addition, young people may visit inappropriate sites. Obviously, pupils may become aggressive and antisocial. Lastly, the widespread use of mobile phones and advanced technological machinery have contributed to the increase of unemployment. What do you think??

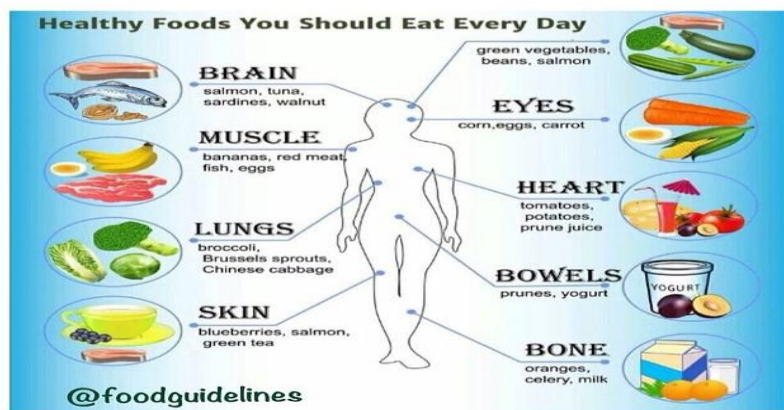

From my point of view, I strongly believe that the government should take drastic measures and legislate certain laws in order to decrease the use of mobile phones. Mobile phones are an integral part of our lives. Last, but not least, there are still alternative ways for teenagers to keep in touch, without resorting to technological developments. How

about that? In conclusion, the benefits of mobile phones outweigh the drawbacks. It is within society's capability to improve this situation and thrive in the future. If I tell the truth? I strongly believe so!!

TIPS FOR HEALTHIER TEENAGER EATING HABITS

TIPS FOR HEALTHIER TEENAGER EATING HABITS

We are teen-agers. As we grow up, we become more independent with our food choices. Unfortunately, according to research in the U.S.A more than 50% of teens don't eat breakfast. Breakfast is a very important meal of the day, which helps you with your weight control, mood and your school performance.

Teenagers tend to eat many unhealthy snacks like chocolate, crisps and soft drinks. It is easy to cut this bad habit!! You could eat fruit, vegetables and other healthier snacks at home. Ask your granny to prepare you some of those delicious cheese pies, or spinach pies or a greek pizza which you could take to school for your brunch!!!!

Make a thirst quenching drink with a variety of juicy fruits, especially in the summer!!!! Prepare a delicious hamburger with home cooked meat, potatoes and a lovely sauce to add to it !! What a great lunch would it be ? It may be difficult at first, but it is worth the effort !

Teenagers use fast food restaurants more often these days, and this is very worrying! Why not try to reduce your visits to fast food restaurants and ask your parents to help you make nice meals at home. Try making a home made crepe or a gyro !!

If you manage to do this, you will soon see a change in your weight, your school and sports performance and your psychology!! Have a go !!!

By Olga Maria Papa

Greece is a seismic country. Especially in Thessaly, earthquakes were very powerful because of the earthquake arc of Sofades. For this reason, the state is obliged to take measures, in order to avoid disasters in future. So the people,

watch out!! EARTHQUAKE!!!! especially in these areas must

be aware of what is an earthquake, how to protect themselves and how to help injured people.

This is the reason we had an earthquake precaution exercise at our school, where all the students and teachers participated. Everyone had a role, but acted as a team because only by cooperating as a team we will manage to survive in case of such a disaster.

By Natalie Palavraki

A most rewarding visit to the premises of the newspaper "EREVNA" and to the bread industry "DIALEHTO"

On 21st March students of our school, who participated in the publication of the English school newspaper, 'YOUTH VOICE' visited the premises of the local, daily newspaper, EREVNA. The 'young reporters' listened with great interest to Mr. Tsagaras a journalist of the newspaper talk to them about the set out, the design, printing and distribution of the newspaper to the news agencies, and eventually to the citizens of Trikala. They were given the opportunity to ask questions in regards to the articles published, the time required for the publication of a newspaper and several other queries.

Next visit for the day, was at the bakery industry of 'DIALEHTO', which is situated at the village Dialehto. It is a family business with several distribution stores both in Trikala and Karditsa. On their arrival, the students were welcomed by the owner of the premises and were given special clothing to wear, for hygienic purposes. They were informed about the machinery, the material used to produce the bread and other pastries. MrPetsas, the owner, also informed them of the workers there, the working hours required by the workers, and a lot more interesting information. The students enjoyed themselves by making their own pastries and tasting their accomplishments.

By Maria Ladokouki & Athanasia Drosou

EDUCATIONAL VISIT TO PLANET PHYSICS

On the 20th of December some students of our school visited the museum, which is in our town, to see the interactive exhibition of physics, in order to learn about the world of physics!!! It was an amazing experience and definitely worth it!!."

It was an opportunity to see physics from another point of view, beyond notebooks and desks", as a 1st year student commented. We would like to refer to the most impressive exhibits which were suspended balls, the plasma, the tsunami, metal magnetic material and the phenomenon of the quantum levitation and many more which we hadn't had the chance to see before, and which really charmed us!! It was such a rewarding visit, where there was so much to learn and see and hope to have the opportunity for something similar again in the future

by Eftihia Adamou & Evangelia Manthopoulou

SPORTS PREFERENCES BY YOUNG PEOPLE

Eleven people were asked about their favourite sports. Half of them prefer to play football, but 30 per cent of them said they preferred volleyball. 10 per cent only preferred basketball, even though it seems to be a very popular sports among young people in Greece, and all over the world. It is very positive to see that the majority of young people play sports because they want to have fun, be fit and healthy. A very small percentage of young people admitted that they play sports in order to

make friends !

by Dimitra Palavra & Amy Boursiani

An educational trip in S.M.Y. and S.E.F.A.A.

Waking up on the 20th of February, I realized that the coveted day had finally come. The 3d grade of our school, would visit S.M.Y. and S.E.F.A.A., in the context of professional orientation. Arriving at school, I could tell that there was something in the air. The teachers, in charge, Mrs Siomou, Mr Theoxaris, Mrs Vaiopoulou and Mr Gaitanas, ordered us to gather around and the trip finally started. Our first destination was S.M.Y.. Its imposing buildings took our breath away, the minute we saw them. We were first given a speech by Mr V. Baganas, concerning the exams one has to sit, in order to pass at it. Afterwards, we were treated with an orange juice and a sandwich and went on to the new established museum there, which offered us the chance to learn about the 731 elevation and to pay a tribute to the fallen soldiers. We then embarked on the buses and visited the facilities of S.E.F.A.A located in Karyes.

Seeing it for the first time we were struck by the impression that it is one of the most technologically advanced places in Greece. And our impression was right. After a short but interesting speech by Mrs Beciari, concerning biomechanics, Exercise physiology and so on, we were given a tour so as to see ourselves the work done there. And so our trip came to an end. On our way to Trikala, we all agreed that we would never forget that

by John Maragos & George Dinopoulos & Dimitra Bandi

A SCHOOL TRIP TO KASTORIA

We set off for our environmental trip to Kastoria early one morning with great enthusiasm. Our first stop was at a village of the town Grevena, called Milia. There, we visited the Natural History Museum. We were given information on the Mammoth who lived there 3 million years ago. At noon we arrived in Kastoria and went for a walk along the lake, where we saw different species of birds. We visited the Environmental Education Centre, where the people there, talked to us about the plants and animals of the area of and around the lake of Kastoria. They talked to us about the eco system, the wetland and the natural evolution of the lake which we found particularly fascinating. On the next day we were divided into teams and took part in activities, in order to learn about the plant and animal life of the area. We also visited the river, Aliakmonas and took specimens of the river water which we used to observe the micro organisms under the microscope. Next, we visited Dispilio, an archaeological, lakeshore settlement where we saw how people lived in the ancient years. A trip, where we received so much knowledge and experiences, and which will be unforgettable to all of us !!! We would all like to thank our teachers Mrs. Zafiri, Mrs. Piroti and Mrs. Koffa who accompanied us on this beautiful trip!!!

by Vickie Lala and Nefeli Papagianni

OUR THREE DAY TRIP TO ATHENS AND NAFPLIO

On March the 3rd year students of our school went on a three day trip to Athens and Nafplio. After a long bus journey, we arrived in the Greek capital approximately at 11am. Our first visit was at the Greek Parliament. We entered the magnificent building with its fine architecture. There was a guide there waiting for us, who gave us some basic information of the building and its history. Then he showed us to the Conference Room, where all the meetings and speeches of the members of the Greek Parliament are held. We were given the chance to sit in the seats and ask the guide several questions about the place and how the government operates in this room

Then, we walked down Ermou st, which is the main shopping area in Athens. At night we watched a comedy play by the actor Seferlis, a most talented comedian.

The next morning, we visited Epidavros, the ancient theatre. A most amazing ancient monument, with great symmetry and beauty, which is used today for dramatic

performances. The theatre is admired for its acoustics and it is spacious enough for 14,000 spectators.

Next stop was at Nafplio, a beautiful seaport town in the Peloponnese. It has very traditional architectural style, influenced by the Venetians. We enjoyed our stay there as we had some free time to do some sightseeing and what else.....go shopping, of course!!!!

On our last day we returned to Athens and visited the most exquisite monument of all, The Acropolis. The Parthenon is built on the holy rock of the Acropolis, which was dedicated to Goddess Athena by the Athenians. A most breathtaking piece of ancient architecture!!! No wonder why it is considered as one of the Wonders of the Ancient World!! The updated Acropolis Museum is an archaeological museum, which is focused on the findings of the Acropolis. A most unforgettable trip which we will never forget !!!! by **Dimitra Bandi**

1ST YEAR STUDENTS' EDUCATIONAL TRIP TO THESSALONIKI

It's clear that the school excursion to Thessaloniki on Wednesday 5th of April was great. The places we visited were: Noesis, which included the Planetarium, Techno-park, Ancient Greek Technology museum, Transport Technology museum and Cosmotheatre, and "Mediterranean Cosmos". Noesis is not only a science centre but also an educational "cinema"! The Planetarium is a building where you can watch 3d videos, without a pair of 3d glasses! The seats have a small tilt backwards so the video can be seen better. We watched a video which is called "From Earth to universe". This video was about the planets of our solar system, galaxies and generally about all the universe.

Cosmotheatre is a place where you can see 3d videos, too. There we watched a film called "Dinosaurs 3D". This video explained the life and development of dinosaurs.

At Techno-park we saw a lot of science experiments such as electricity, energy and power experiments and weather forecast effects.

At Ancient Greek Technology museum we saw a lot of exhibits which are related to the Ancient Greeks. One of the most admirable exhibits was the Antikethera Mechanism.

This mechanism was the first "computer"!

Mediterranean Cosmos is a place which has a lot of shops and fast food restaurants. I don't think there are more things to tell you about Mediterranean Cosmos, because all of you must have been there.

In my opinion this excursion was excellent! Personally, I think the highlight of our excursion was the video at Planetarium "From Earth to universe" because we learnt a lot about our planet and generally about our universe!

by **Antonis Tyrnenopoulos A3**

2nd year STUDENTS' TRIP TO THE ARCHAEOLOGICAL MUSEUM IN THESSALONIKI AND THE WHITE TOWER

Our trip to Thessaloniki was amazing. Our first stop was at the Archaeological Museum. The central rooms hold exhibits from the archaeological excavations conducted in Thessaloniki and the broader area of Macedonia. We were given a very interesting tour of the exhibits of the museum by a guide, who answered to all our queries. Our next stop was at the White Tower. The White Tower is a monument and museum situated in the centre of the city, looking over the sea. After being separated into small groups, we entered the six floor building. Climbing the large circular staircase, we stopped at each floor and observed the exhibits in the galleries..

Each floor has a central circular chamber, which communicates with the other smaller rooms, with openings on the outer walls.

The last floor has only a central chamber, but there is also an outdoor area which offers great view of the city and the sea. On our way to "Mediterranean Cosmos", we enjoyed a 30 minute tour around the city. A really beautiful city!! Our last stop was at the shopping mall "Mediterranean Cosmos". It is a place where you can have a coffee, or a snack, or even a proper meal before wondering around the shops for some shopping, or even just window shopping !!

by **Melina Foufa & Peggy Patriki**

FOR FILM Maholics only

A film review on **Mortal Kombat**(1995) **Mortal Kombat** is a 1995 action-fantasy film based on the popular video games created by Ed Boon and John Tobias. The film was directed by Paul W.S. Anderson, who at the time was only credited as Paul Anderson.

The film stars Robin Shou, Linden Ashby, Bridgette Wilson, Talisa Soto, the late Trevor Goddard, Chris Casamassa, Francis Petit with Cary-Hiroyuki Tanawa as Shang Tsung and Christopher Lambert as Lord Rayden. The film had an amazing soundtrack, in particular the song "Techno Syndrome" by the Immortals, which was featured in the title sequence. It

revolves around a group of three people, who after travelling to an island, so as to fight in the tournament of Mortal Kombat, who after being found by the Elder God Rayden, became the team that will protect the Earthrealm from the villainous emperor Shang Tsung.

The first member, Liu King, is the Chosen One and he wants revenge for the death of his little brother at the hands of Shang Tsung.

The second member, Johnny Cage is an actor who wants to prove to the world that he does his own stunts, by fighting in the Mortal Kombat tournament, and the third

member, Sonya Blade is a secret service agent, who wants revenge on one of the Kombatants, Komo, for killing her entire squad of agents .

The movie got mixed reviews by audiences and critics alike, but was loved by fans of the games because of the attention to detail put into the film. The positives of the movie , according to most people are the incredible techno soundtrack, the amazing sets and props, the fight choreography and the performances of Linden Ashby, Christophe Lambert, Trevor Goddard and Cary-Hiroyuki Tagawa as Johnny Cage, Rayden, Kano and Shang Tsung respectively.

Even Gene Siskel, one of America's most respected film reviewers gave this film a positive "thumbs up" .while it also won the BMI Film Music Award. I highly recommend Mortal Kombat. It is a fun action-packed adventure with gripping fight scenes, incredible performances , and a story that will keep you at the edge of your seat. I suggest that you should see the movie and invite your friends to watch it with you!! You are sure going to have an amazing time!!!

by film critic Adam Michalichis B5

MUSIC LOVERS

Music has been around almost as long as human beings. We hear it everyday, it motivates us, it makes us cry, and it will always be present in our lives. Music trends change

Trends Through The Decades

everyday.

Through the decades there are different ranges of music.

In the 1940's people listen and dance Swing, Jazz, Blues and Big Band. Some of the most famous artists of 1940 were Rosemary Clooney and Frank Sinatra. **In the 1950's** they liked Rock 'N Roll, B-bop, Big Band, Country and one of the most well-known singers was Elvis Presley.

In the 1960's people's favorite music was Motown, Rock 'N Roll, and The British Invasion. The biggest bands of the decade were The Beatles and The Rolling Stones.

In the 1970's they loved Disco, Motown, and R&B. The most famous musician of that decade were Diana Ross, ABBA, Donna Summer, Queen.

In the 1980's people used to listen and dance Glam rock, Pop, Hip-Hop, Country. Some of the most popular singers were Michael Jackson, Cyndi Lauper, Bon Jovi, Tina Turner.

In the 1990's people's choice in music was Grunge, Alternative, Rap, and Country. There were many singers that created unique songs, like Nirvana, Britney Spears, Backstreet Boys, N' Sync.

In the 2000's they usually listened to Adult Contemporary and R&B and the singers of that period were Backstreet Boys and Beyoncé.

Finally in the 2010's we adore listening to EDM and Hip-Hop This decade seems to be leaning a lot towards Electronic Dance Music and this new trendy genre is blowing up all over the world. We are only half way though this decade and already music has taken a turn to bass filled, fast paced dance music.

After all this information we can conclude that there are many similarities in music trends through the decades but there are also many big changes. Music will continue to change and develop before our eyes.

There is a crossword for you below: Find **15** words.

C	W	B	N	I	R	V	A	N	A	O	G	H	Q
Z	G	D	R	G	N	E	F	J	V	Q	U	R	D
Z	J	M	S	O	X	D	B	O	P	O	P	M	I
I	U	U	H	T	M	X	I	E	S	F	K	L	S
F	Z	S	A	I	U	C	G	L	A	O	S	V	C
